

AOG Service 24/7/365

"Aircraft on Ground" (AOG) is a term in aviation maintenance indicating that a problem is serious enough to prevent an aircraft from flying. Generally there is a rush to acquire the parts to put the aircraft back into service, and prevent further delays or cancellations of the planned itinerary.

Turbine Engine Specialists (TES) is an on-call, on-site service company focused on getting your aircraft back into service. We send factory trained and licensed technicians who have earned a reputation for excellent performance and service. We live by our motto; if your AOG call TES and we will take ACTION.

AOG: Your Call becomes our Action
